Co-Chairs, Jeff Merrifield, Pillsbury Law and David Wright, Wright Directions

“Shared Perspectives” White Paper

Carolina Federal – State Energy Policy Briefing

Coming Soon!

“Shared Perspectives” Workshop in Raleigh

September 26, 2016 7

- The Policy Task Force is Co-chaired by George Baldwin, David Wright and Jeff Merrifield.
 - I focus on North Carolina energy policy
 - David is the former Chair of the SC PUC and focuses on South Carolina energy policy
 - Jeff is a former NRC Commissioner, works in WDC and focuses on Federal energy policy
- We are not a lobbying organization. We are a policy information group. Our objectives are to:
 - Provide objective information to inform our policy-makers
 - Connect policy-makers with our members to inform our members
 - Provide the E4 Carolinas a single voice to express common policy views
- This Task Force meets as needed
 - Typically once each quarter
 - sometimes quite frequently via phone when an important policy matter arises
- Any E4 Carolinas member with an interest in energy policy may contact the appropriate Task Force Co-chair to suggest we explore or provide information on a topic
- Examples of energy policy issues in which we been active in 2016 include
 - **Utility of the Future** – Ronak Bhatt has during 2015 and 2016 lead a continuing series to discuss the design of the utility of the future. This work result in the release of a white paper in May which can be found on our website in the Policy Task Force section. A workshop of the “Shared Perspectives” described in that white paper is being planned.

- **Policy-maker Requests** – Our President met individually with our various federal policy makers in Washington, he has presented to the North Carolina Energy Policy Commission and we have responded to various policy-makers requests for information and for nominees to various state energy councils, committees and task forces.
- **Carolina Federal/State Energy Policy Briefing** – On Friday, August 26th, the Policy Task Force produce a briefing by federal and state energy policy officials for more than 100 members and energy professionals. (Elaborate)
