

Project Management for Energy Professionals

Graduate Certificate

PROGRAM OVERVIEW

Technical and managerial employees at all levels of organizations are being asked to manage small and large projects. Many of these professionals have not been specifically trained to effectively and efficiently manage projects. This program provides the practical and theoretical knowledge that is aligned with the Project Management Institutes international standard. By completing this program, students will have the opportunity to acquire and validate the competencies they need to successfully lead project oriented work in diverse and complex project environments. Additionally, the program fulfills the educational eligibility requirement for the Project Management Professional (PMP®) certification exam.

This **certificate program in project management** is designed with sufficient course flexibility to accommodate professionals with various levels of project management experience.
